

## **A quick Step by Step Guide to Downloading Library eBooks**

### **For Kindle, Nook, Sony, Kobo or other e-reader users:**

1. Go to the library's website at <http://www.worcpublib.org/>
2. Click **Digital Downloads** in the left column <http://www.worcpublib.org/resources/audiobooks.htm>
3. Choose **Overdrive**
4. **Sign in** with your library's card number
5. Click **Advanced Search**
6. **Under Format:**  
choose **Kindle** if you have a Kindle,  
choose **EPUB** if you have Nook or other e-reader.
7. Check **Only Show titles with copies available**
8. Then click **Search**
9. After you choose a book, click **Proceed to check out**
10. After the item is checked out,

### **For Kindle users:**

- you will be prompted to Get for Kindle button.
- Click the button, then you need to log in your Amazon account.
- Choose which device you want Amazon to deliver the library ebook to under Get Library book.
- Your library book should show up on your Kindle. If not, press Menu button on your Kindle, then choose Sync.

### **For Nook, Sony, Kobo or other e-reader users,**

- before you click on Download button, you need to following the link above Download button to download the needed software (adobe digital edition) to your computer.
- Follow the instructions on the page to activate your computer and your device.
- After that, click Download, your book will be downloaded into Adobe Digital Edition on your computer.
- Then connect your Nook or other device to your computer. Your device will show in the left column of the digital edition panel.
- Then drag your book into the device. Unplug your device, sync your device, your ebook should appear on your device.

### **For Kindle Fire users:**

Follow the instructions for Kindle above on your Fire. You don't need to use a computer to download a library ebook.

### **For iPad, iphone or any other tablet or smartphone users:**

All you need to do is to download free Overdrive app on your device. Choose an ebook in EPUB format (see instructions above) and then download it through your device.
